

PEDIATRIC CASE STUDY #5

Chief Complaint

5 yo male Tim brought to clinic by parent, complaining of fever of 103 x 2 days, headache, muscle aches, sore throat and blisters on palms and soles of feet.

Prenatal: No problems.

L&D: NSVD, Apgar 9,10

Infancy: Breastfed until 12 months. Normal growth and development.

Current Health Status: Tim has no other health problems. He is in the 50% for height and weight.

Immunization: UTD

Medications: None

Family History: Only child, lives with both parents.

Physical Exam: Alert, oriented, 5yo old male.

HEENOT – Eyes: Erythematous watery conjunctiva. Ears, nose and dentition normal. Throat: multiple erythematous blisters in pharynx.

Abdomen – soft, nontender

MS – multiple erythematous blisters on palms and soles

Neuro – nl

What is your differential?

What tests will you order?

What is your diagnosis?

What treatment will you prescribe?

Where else should parents expect to see more lesions?

DISCUSSION

Using the 4 IPEC Competencies (2016) related to:

1. Working with individuals of other professions to maintain a climate of mutual respect and shared values (Values/Ethics for Interprofessional Practice);
2. Using the knowledge of one's own role and those of other professions to appropriately assess and address the health care needs of patients and to promote and advance the health of populations (Roles/Responsibilities);
3. Communicating with patients, families, communities, and professionals in health and other fields in a responsive and responsible manner that supports a team approach to the promotion and maintenance of health and the prevention and treatment of disease (Interprofessional Communication);
4. Applying relationship-building values and the principles of team dynamics to perform effectively in different team roles to plan, deliver and evaluate patient/population-centered care and population health programs and policies that are safe, timely, efficient, effective, and equitable (Teams and Teamwork).

Please collaborate as a team to develop a management plan for the above patient.

- Oral-Systemic Risk Assessment
 - Identify the oral-systemic assessment findings (Hx and PE HEENOT)
 - What does the history and physical tell us about this patient?
 - What additional data do you need to collect (eg. labs, diet and exercise, etc)?
 - Identify oral-systemic risk factors
- Differential Diagnosis(es)
 - Identify the tentative diagnoses for the oral health problems
 - Identify the tentative diagnoses for the systemic health problems
 - Discuss the important oral-systemic connections
- Develop a management plan for the oral-systemic conditions affecting this patient, including:
 - Preventive interventions that include screening and behavior change counseling that are fundamental to patient-centered care
 - Anticipatory guidance
 - Oral health maintenance
 - Collaboration and referral

Questions to Guide Your Interprofessional Collaboration

- Roles and Responsibilities
 - What is the scope of the role and responsibilities of each of the providers on your team today?

- Collaboration
 - How can the Nurse Practitioner, Dentist, Physician, Pharmacist, and Social Worker collaborate to promote this patient's health?
- Team Building & Communication
 - What do you think are the most effective strategies to help a Nurse Practitioner, Physician, Dentist, Pharmacist, and Social Worker function as a community-based primary care team?
 - What are the most effective ways for the IP team to communicate?
- Referrals and Follow-up
 - What providers does this patient need to see? When? How often?
 - What are the appropriate follow-up actions for each member of the primary care team?
